

# ULTRA

Ultra Fast. Ultra Convenient. Ultra Efficient. CertiflexDimension Ultra.

## QUICKBOOKS IMPORTER

{ The ultimate integrated solution for accounting professionals }

Clients using QuickBooks® are a key revenue source for today's savvy write-up service provider. Let CertiflexDimension QB Interface be the ideal bridge between your clients' book-keeping system and your professional write-up service.

The flexible and intuitive QB Importer module is the impeccable electronic "shoebox" to seamlessly transform your clients' QuickBooks® data into CertiflexDimension batch transactions. Never have to manually enter detailed client data again. But always have the power and accessibility of easy-to-append, easy-to-edit and easy-to-adjust after-the-fact transactions. Reclassifying, or literally fixing, client account distributions has never been simpler.

It really is as simple and easy as click, click. Add the CertiflexDimension QB Importer module to your professional accounting toolbox today.

- Tap directly into your clients' Quick-Books® transaction files in either detail or summary format.
- An intelligent account cross-reference matrix lets you decide how QuickBooks® accounts are mapped to CertiflexDimension Client Write-up ledger accounts.
- Send your adjusting entries back to your clients' QuickBooks® system without interrupting their daily operation
- Includes advanced QuickBooks® account analysis techniques. Clients do not always apply good accounting principles when making "unexpected prior-period adjustments". A simply, yet sophisticated account analysis quickly detects, isolates and notifies you of all prior-period client entries.
- Works seamlessly with QuickBooks® Standard, Professional or Enterprise additions 2000 forward. You are not required to have each QuickBooks® version installed on your desktop.
